When we taste food, our mouths tell us if the food is sweet, salty or spicy. But why do some people like some types of food and not others ? There are many reasons. For example, some people don't like a type of food because they remember being ill after they ate it.

However, it is believed that you can change what you like. We often don't like unusual food because our brain doesn't understand **it**. So, if you want to start liking food that is healthy, such as green vegetables, you should eat it more often. Then your brain will **recognize** it. You can also train your brain not to like something. For example, many people who stopped putting sugar on things found, after a time, that they didn't like sweet things. So, if you like sweets and don't like vegetables, you should train your brain to eat more healthy!

## Paragraphs & Emails

مفردات إنشائية ورسائل بريد الكتروني ورددت بالوحدة

### Paragraphs

#### 1- Are you for or against online shopping?

Shopping online is great! Firstly, it saves time. Most people don't want to spend much time travelling to the shops. They can stay at home and buy the things they want in a few minutes. Secondly, they have more choices online. Also, if more people shop online, there will be fewer cars on roads and less pollution! However, some people don't like online shopping. They like to try the things they are buying first. Also, they don't like to waste time waiting for a delivery.

#### 2- How do you think life will change in the future?

What will happen in the future? This is a question most of us ask. For me, I think travelling in time will be impossible. I don't think we will live on the moon. It's impossible. I think we'll have flying cars. I hope we will have no illnesses. I think scientists will explore the bottom of the sea. They may discover new animals and new kinds of fish. I think life in the future is still a secret.

#### 3- Life in the future (Azhar)

Technology changes the world. People will use social media more than they do today. They will be able to travel in time by using time machines. They will have flying cars. They will live on the moon.

#### 4- Positive and negative sides of using technology

Using technology has become very important in our life. Most of our daily activities need technology. Using technology is sometimes positive. It saves effort and time. The negative side of using technology is that it sometimes wastes our money and time. Playing computer games is an example of that. But should schools use computer games in the classroom? I think it'll be positive if that is related to teaching children. They will be more interested and excited, but this should be controlled well.

Dear Hanaa,

How are you? Thanks for your last email. You asked me to describe my favourite snack. I love hawawshi and I often have it when I get home from school. It is easy to make. First, you need some nice bread. Then you put some meat and vegetables inside the bread. You can put some salt on it, too. I don't like to have any salt, though, because it is not very healthy. Now you cook it in the oven. It is delicious! Do you have any favourite snacks? Describe them to me in your next email! Best wishes.

Yours,

Judy
